As I'm sure many of you are aware, our company stores a lot of harmful substances for our customers.

While the company does have a thorough screening process for who can buy these dangerous substances, unfortunately they cut a lot of corners when it came down to actually storing these substances.

At this point, more or less, our samples are exposed to even the most feeble of security threats.

dude how was I supposed to know you guys had gotten the leaf blower out already. ha ha

speaking of exposed and feeble that reminds me of Chase at Dennis's party last week haha

man we were so wasted, bro. damn that was a party

oooooooh

aw man bro!

We're going to have to make some major changes here, guys.

IF we want to ensure the safety of the company, and the general public, we need to adopt this new storage system.

speaking of insurance i sure hope dennis had some For his dirt bike lmao

yooo haha

i mean that was like a clean puncture, bro

man that was a party alright

look ma'am, we're going to have to wait for reinforcements

with my current loadout I can't guarantee the safety of your staff

"Loadout"? you sound like my son playing one of his - Look, sir, the whole staff is out here, we're completely safe. It's just a little alien in there

ma'am I'm sorry but I'm really going to need some extra firepower to make sure i can keep it under control

I mean these guys can be pretty bloodthirsty. i really think it would be brash to send me in there underequipped

I don't want you in there shooting that thing with a machine gun! You'll blow my damn furniture to bits, and the little guy was just sitting there!

uh, I actually have some experience with these Excur guys. I could maybe go check it out?

what, no

i can deal with it i just need some more protection. really we can't -

oh

We can't solve this problem because you want to bust in there lookin' like some sort of commando!!!

ma'am

ma'am

ma'am i really need to have some-

You have a pistol! There's no reason you can't just go in there and chase the damn thing out the back!!

it's unnecessary for you to go in there carryin' the whole HCPD armory on your back!! And since when did this become a combat scenario

ma'am i can- ma'am

ma'am i would but it really seems unsafe to go in there without backup and really i'd like to have some extra guns

it's not often i- we get to deal with these sorts of combat scenarios
